BDR is a manufacturer company founded in 2012 and based in Zaragoza (Spain). It is focused in the development, production and sale of CE-IVD products for human diagnosis, and specialized in the areas of HLA, hematology and rare diseases. BDR is offering two product lines: Genvinset® (based on qPCR technology) and Adellgene® (based on fragment analysis one). Additionally, it has its own bioinformatics department which has developed software tools for result interpretation.

Trademarks:

Genvinset® and Adellgene®

www.monlab.com

Monlab is a company dedicated to manufacture, distribute and provide services to clinical diagnostic laboratories since 1985. Based in Barcelona, we work to provide the best solutions to the sector, constantly improving our attention and service. We try to adapt to the demands of each of our customers, with the aim of helping progress in clinical diagnosis and contribute to improving the quality of life of patients and people. Our wide range of products includes rapid tests, reagents, analyzers or infusion material among other diagnostic products and we are tenaciously looking to adapt to the circumstances of the moment through an efficient performance. The scope of action of the institution lies in clinical analysis laboratories, hospitals, health centers, related faculties, as well as clinical-scientific research centers.
